

**Please join us for an Introduction to the Collaboration for Non-Animal Cosmetic Safety Assessment Globally by 2023 (NACSA):**

**Decision making in non-animal cosmetic safety assessment.  
May 2, 2019 12 PM (noon) – 1 PM EST**

There has been significant progress globally over recent years in advancing the science to underpin non-animal cosmetic safety assessment. However, to achieve complete animal testing-free cosmetic safety assessment globally, more remains to be done. A new collaboration, Non-Animal Cosmetic Safety Assessment Globally (NACSA), led by Humane Society International and involving industry and other stakeholder partners, has been formed to achieve this goal by 2023. A significant part of this collaboration focusses on sharing experience on evolving decision-making approaches without new animal testing. These risk assessment processes are necessarily exposure-led, product and use-specific and iterative. The expertise of multiple stakeholders and relevant case studies will be developed to provide clarity on how to make risk-based cosmetic safety decisions through the integration of scientific evidence from multiple sources. Training modules will focus existing and developing tools and concepts applied to reaching a safety decision. Structured following the International Cooperation on Cosmetics Regulation (ICCR) Next Generation risk assessment (NGRA) these modules will be based on the SEURAT workflow (Berggren et al. 2017. Computational Toxicology 4: 31-44).

Introduction to NACSA, Catherine Willett, HSI  
ICCR/NGRA principles, Matt Dent, Unilever  
Next Generation Risk Assessment for Skin Allergy case study,  
Gavin Maxwell, Unilever  
Implementing a NGRA - an exposure led, mode of action driven case study,  
Catherine Mahony, P&G on behalf of Cosmetics Europe  
Q&A and audience input: Priorities for Education & Training
